## Lantern 4117-III-3

The Wrought Iron Family

Featuring classical baroque shapes and ornaments this lantern from wrought iron simplifies the voluminous design. This way a modest interpretation of baroque ornaments is created.

The item is made from bars of raw iron and carefully forged from hand by our artful metal smith. The delicate leaf décor on top is a piece of art in itself. The surface is usually lacquered black but there are countless variations of finish available.

Fixtures like this are very prominent in rural surroundings but can also be found in antechambers and stairways of urban residences.
